MIC3 Summary with Provisions

The Interstate Compact on Educational Opportunity for Military Children was developed jointly by The Council of State Governments' National Center for Interstate Compacts and the U.S. Department of Defense, with input from policy experts, national associations, teachers, school administrators, military families, and federal, state, and local officials. The Compact eases interstate education transition challenges encountered by the children of active-duty service members such as enrollment, eligibility, placement and graduation. On average, military students will attend six to nine different school systems from kindergarten to 12th grade.

The Compact is administered by the Military Interstate Children's Compact Commission (MIC3). School liaisons use the Compact to support military-connected students during education transitions. To learn more about MIC3 and the Compact watch this short video and read the Parent FAQ.
